

FINAL PROJECT REPORT

DIGITAL LITERACY PROJECT REPORT

Name: *Akshat Singh Baghel*

Course: *CSE0001 – Digital Literacy*

University: *VIT Bhopal University*

1. Introduction

In today's hyper-connected landscape, technology is the backbone of communication, education, and information exchange. While I initially felt confident in my digital fluency, this project revealed that true digital literacy extends far beyond basic navigation. It is about the responsible, strategic, and ethical application of digital tools.

Throughout this project, I transitioned from a passive user to an active creator by building online profiles, engaging with coding platforms, and designing data-driven infographics. More importantly, I gained a deeper understanding of online safety—learning how to leverage technology effectively while staying mindful of the risks and responsibilities that come with a digital presence.

2. Objectives of the Project

The main objectives of this project are:

- To understand the concept of digital literacy
- To create and manage a digital presence
- To learn basic coding and problem-solving skills

- To understand online safety and cyber threats
 - To improve communication and presentation skills
-

3. Task 1: Infographic Creation

In this task, I created a digital infographic to explain the concept of digital literacy. I used an online design tool to create a visually appealing and informative infographic.

The infographic included key points such as:

- Meaning of digital literacy
- Importance in daily life
- Safe internet practices
- Digital skills required for students

This task helped me improve my design skills and taught me how to present information in a clear and engaging way.

4. Task 2: Digital Portfolio

In this task, I created and managed my digital presence on different platforms. I created profiles on:

- GitHub
- LinkedIn
- Kaggle

Through this, I learned how to build a professional online identity. I understood the importance of presenting accurate information and maintaining a clean and professional profile.

This task also helped me realize that digital platforms are not just for usage but also for showcasing skills and opportunities.

5. Task 3: Platform and

Tools

This task included two main parts:

Coding Practice

I solved a basic problem on a coding platform. This helped me understand problem solving and logic building.

Google Form Creation

I created a quiz related to digital literacy and online safety. I also analyzed responses using Google Sheets.

This task improved my understanding of:

- Online tools
- Data collection
- Basic analysis

6. Task 4: GitHub Repository

In this task, I uploaded all my work to a GitHub repository. I learned:

- How to upload files
- How to organize folders
- How version control works

This task was very useful as it helped me understand how developers manage their work online.

7. Task 5: Cybercrime Awareness

In this task, I studied about cybercrime, especially phishing attacks. I learned how attackers trick people into sharing personal information.

I also created a prevention checklist which included:

- Not sharing passwords
- Verifying links
- Using strong passwords
- Being careful online

This task made me more aware of online risks and how to stay safe.

8. Key Learnings

Through this project, I learned:

- Digital literacy is more than just using technology
 - Online presence should be professional and truthful
 - Cyber safety is very important
 - Communication should be clear and respectful
 - Practical skills are more important than theoretical knowledge
-

9. Challenges Faced

During this project, I faced some challenges:

- Understanding GitHub initially
- Creating proper file structure
- Designing infographic properly

- Managing different platforms

However, I overcame these challenges by practicing and learning step by step.

10. Conclusion

This project was a highly valuable and enriching learning experience for me. It gave me a deeper understanding of the importance of digital literacy in today's real-world environment, where technology plays a crucial role in almost every aspect of life. Through this project, I not only enhanced my technical skills—such as working with digital tools, organizing information, and creating structured content—but also developed a strong awareness of how to use digital platforms in a responsible and ethical manner.

I learned the significance of maintaining online safety, protecting personal information, and communicating effectively in digital spaces. Additionally, this project helped me understand how to build and maintain a professional online presence, which is essential for future academic and career opportunities.

Overall, this experience has significantly boosted my confidence as a digital user. It has made me more aware, responsible, and capable of navigating the digital world efficiently. I am committed to continuously improving these skills and applying them in my academic pursuits as well as in my future professional journey.
